Multimedia Transcoding - Btrfs Support - Maximum Value

Affordable personal cloud bringing high performance for individuals and families.

AS3304T v2

- Equipped with Realtek RTD1619B 1.7GHz quad-core processor
- Superfast 2.5-Gigabit Ethernet
- 2 GB DDR4 RAM
- Upgraded powerful internal display, smooth transcoding of 4K videos
- Supports Wake on LAN and Wake on WAN
- Btrfs/iSCSI Snapshots
- Tool-free installation

PLEX (<https://docs.google.com/spreadsheets/d/1MfYoJkiwSqCXg8cm5-Ac4oOLPRtCkgUxU0jdj3tmMPc/edit#gid=314388488>)

All-New Realtek RTD1619B Quad-Core Processor at 1.7 GHz

2.5-Gigabit Ethernet

Upgraded powerful internal display, smooth transcoding of 4K videos

Btrfs/iSCSI Snapshots

Supports Wake on LAN and Wake on WAN

CPU and iGPU Upgrades

The Drivestor Pro Gen2 contains a 1.7 GHz CPU, which is faster than the found in the first generation of Drivestor Pro NAS devices. The upgrade contains an upgraded iGPU that provides significant upgrades in transcoding features and performance, making the Drivestor Pro Gen2 the best price performance NAS.

Realtek RTD1619B

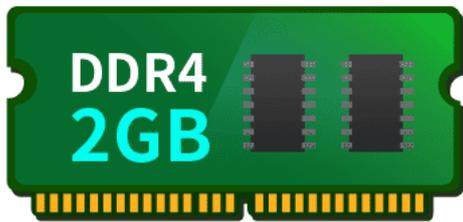

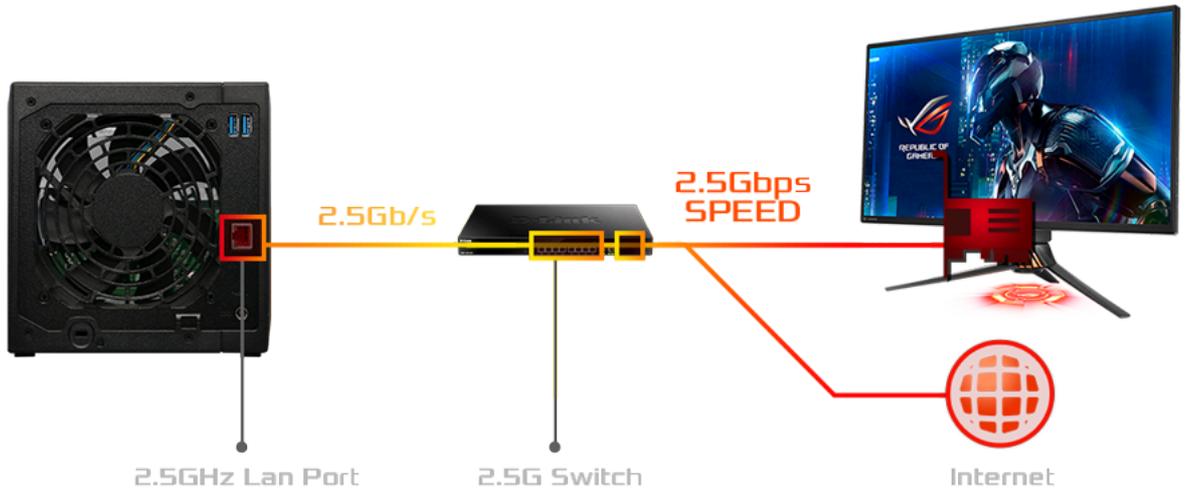

Realtek RTD1296

2.5-Gigabit Ethernet – Double Speed

The Drivestor 4 Pro Gen2, despite being extremely affordable contains 2.5-Gigabit Ethernet and more than doubles the performance of comparable Gigabit devices.

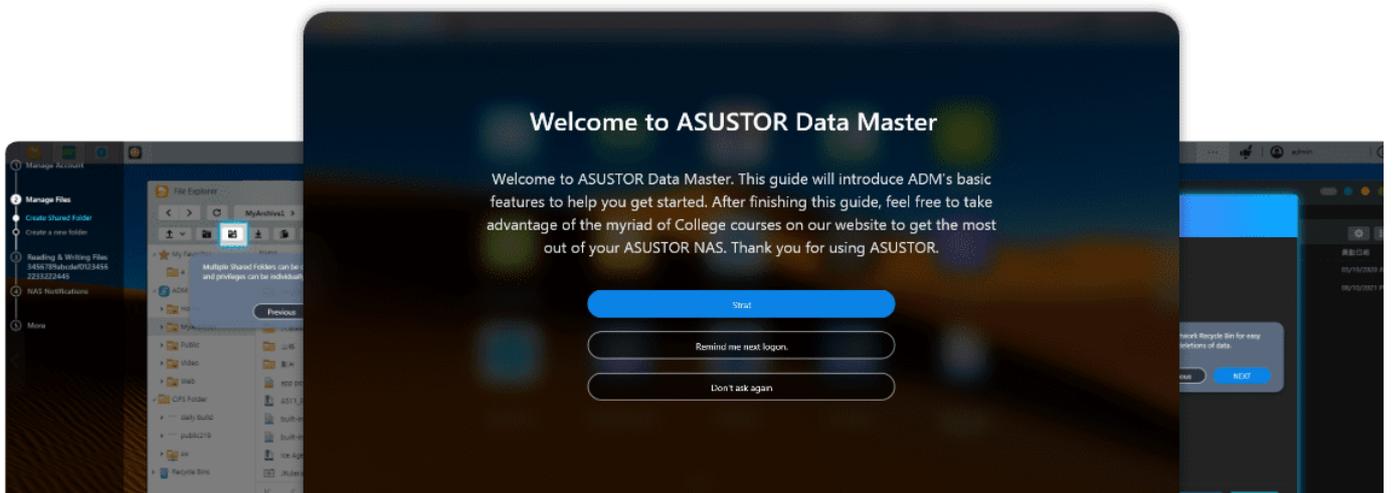

2GB DDR4 RAM

The Drivestor Pro Gen2 handles multitasking with ease by utilizing its 2 DDR4 memory ensuring that virtually any task on an ASUSTOR NAS is smoothly.

Easily Get Started with ASUSTOR

The all-new navigation page helps make controlling your NAS and data even easier. A user friendly UI incentivizes becoming familiar with the numerous features ASUSTOR NAS provides to ensure better data security.

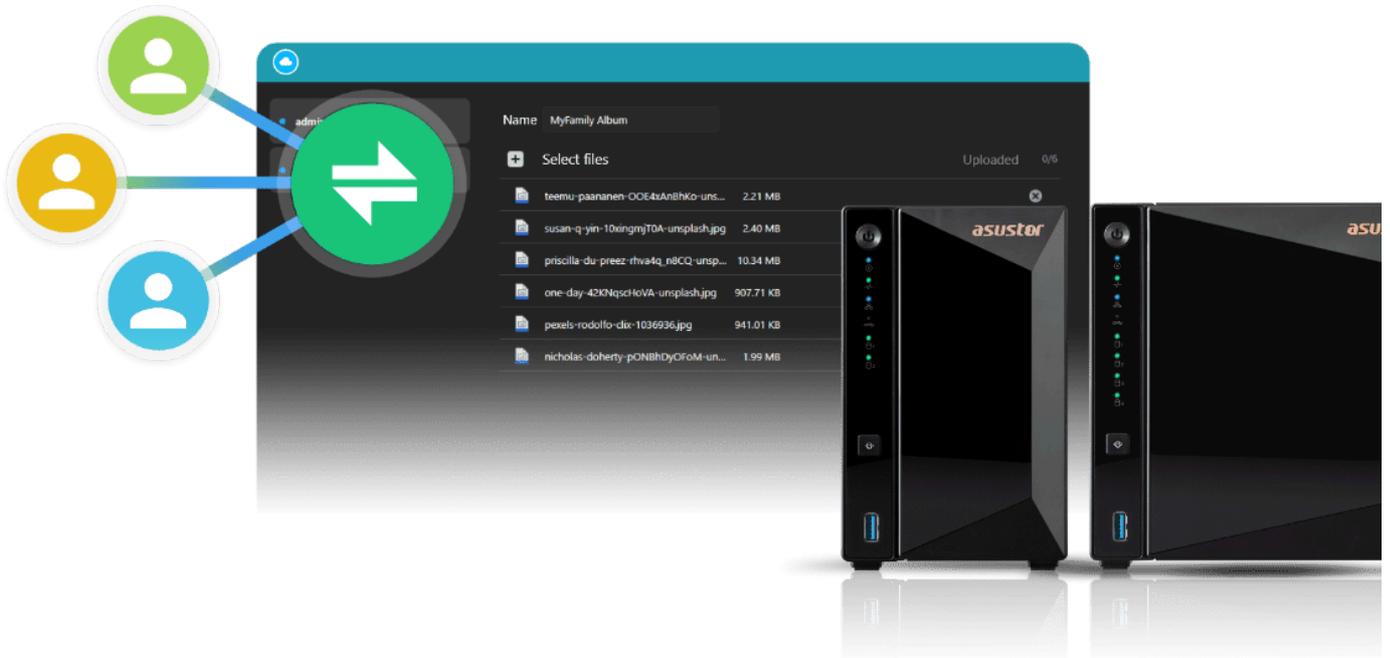

Efficient and Powerful

The Drivestor Pro Gen2 are ASUSTOR's highest value devices ever. Transcode 10-bit 4K H.265 media with hardware decoding easily that enables unbelievable smooth video playback in LooksGood.

Share and Share Alike!

Share links can create hyperlinks to share with other people to upload and download files to and from an ASUSTOR NAS. While share links come with many customizable options to increase convenience or security, people that use a share link are not required to have an account to upload and download files on link, making it more convenient for project collaboration or organizing travel photos.

Btrfs for ARM is Here!

The Drivestor Pro Gen2 is the first ARM NAS by ASUSTOR to support Btrfs. Use your Drivestor Pro Gen2 to create Btrfs snapshots in Snapshot Center for protection. Snapshot Center supports scheduling or manual creation of snapshots, making it easier to restore files after unintentional modifications. Snapshot used to respond to ransomware threats in real time and help effectively protect data integrity.

The image illustrates the Btrfs snapshot functionality on ASUSTOR NAS. It features two ASUSTOR NAS units on the left. Above them is a diagram with a central 'Btrfs' circle connected to two server icons. To the right, a horizontal timeline shows five snapshots taken at 08/20 PM 01:58, 08/20 PM 05:37, 08/21 PM 01:58 (highlighted with a blue circle), 08/22 PM 01:58, and 08/23 PM 01:58. Below the timeline is a computer monitor displaying the Snapshot Center web interface. A blue callout box above the monitor says 'Max: 256 Snapshots'. The interface shows a volume overview with a pie chart, a history table, and a schedule tasks table.

volume1	08/20/2018 PM 01:58	Weekly	10 hours

Tool-free Installation

ASUSTOR's Driverstor Pro Gen2 series introduces its new tool-free caddies as a way to simplify installation of hard drives. Each NAS comes included with to install the drive easily. On the Driverstor Pro Gen2 series, hot-swapping of hard drives is supported, allowing you to change hard drives easily without po down the NAS.

Exclusive MyArchive Cold Backup Technology Unlimited Capacity Expansion

MyArchive cold storage technology turns NAS hard drives into removable storage archive drives. Directly insert a MyArchive hard drive into a free bay inside NAS to easily access, backup and share terabytes of content.

Protected From the Inside and Out

Protect your data from loss, damage and attacks with the ASUSTOR NAS. An ASUSTOR NAS is better protected by running the Linux-based ADM, employing firewall, ClamAV Antivirus, MyArchive and ADM's various backup tools help protect ransomware even better.

Network Attack Protection

- Firewall
- ADM Defender
- Cloud Backup Center offsite backups

Secure Data Transmission

- VPN connection
- SSL certificate connection
- Automatic logout

Internal Data

- MyArchive on and offsite backups
- AES-256 folder encryption
- Antivirus software

Access Control

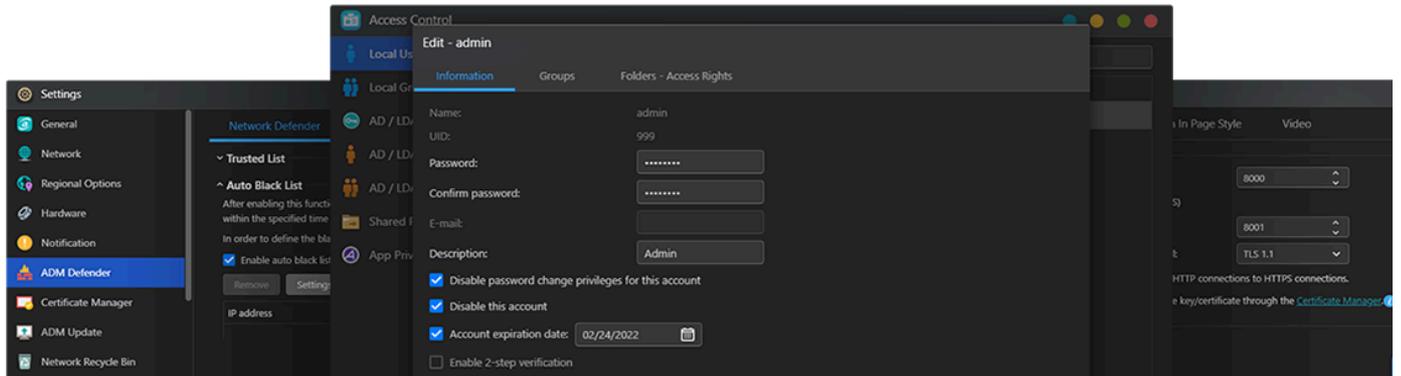

- File/folder/app isolation
- 2-Step Verification
- Wake-on-LAN (WOL)
- Wake-on-WAN (WAN)

*MyArchive not applicable: AS10, AS11(Drivestor)

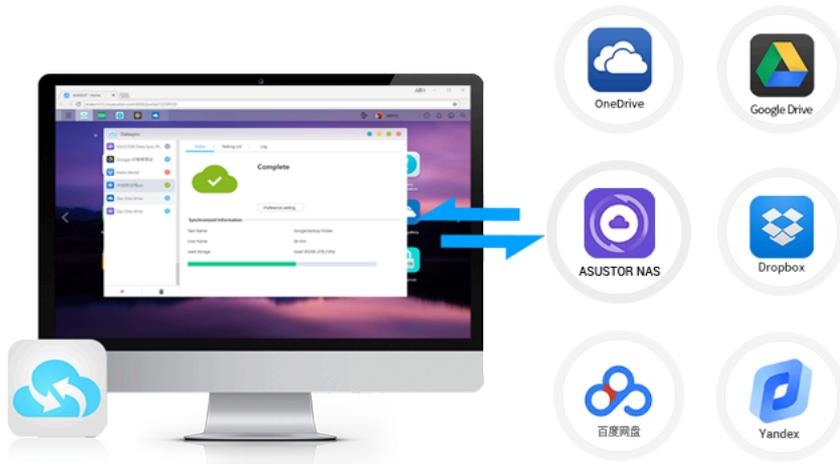

Protected From Ransomware

The Lockerstor comes with the most up-to-date version of ADM to help protect against ransomware attacks. With Snapshot Center and Btrfs providing efficient snapshots to easily restore lost data. Other security features found on the Lockerstor are the ability to create one or more replacement administrator accounts, a firewall by ADM Defender that features black and white lists and the ability to change default ports, disable SSH and Terminal to prevent remote attacks. My cold storage hard drive security can also be increased by implementing AES 256bit encryption.

DataSync Center

DataSync Center combines multiple cloud services into a single app. DataSync Center includes, but is not limited to Google Drive, Dropbox, OneDrive and and supports multitasking as well as multiple accounts. Control your data with instant and scheduled backups as well as using Cloud Backup Center to create a cloud that keeps your data online and offline, keeping your data protected.

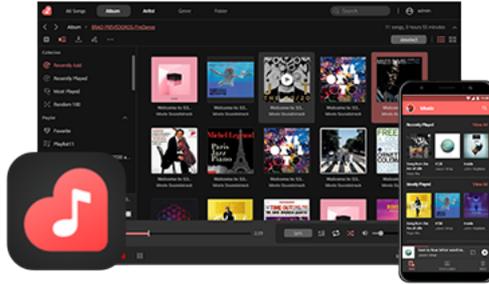

Cloud Backup Center

Cloud Backup Center brings support for various business cloud services including, but not limited to Amazon S3, Backblaze B2, Baidu Cloud, IBM Cloud, F Cloud Files, Microsoft Azure Blob Storage, Alibaba Cloud, Google Cloud Storage, Box, hicloud S3, Lyve Cloud, SFTP and WebDAV. Control your data with and scheduled backups as well as using Cloud Backup Center to create a hybrid cloud that keeps your data online and offline, keeping your data protected

Create the Ultimate Home Multimedia Center

Enjoy electrifying digital entertainment on demand with ASUSTOR NAS. Through ASUSTOR's App Central, you can install additional multimedia server Apps like UPnP Media Server and OwnTone giving your NAS the ability to stream multimedia content to your computers, TVs and mobile devices.

AiMusic

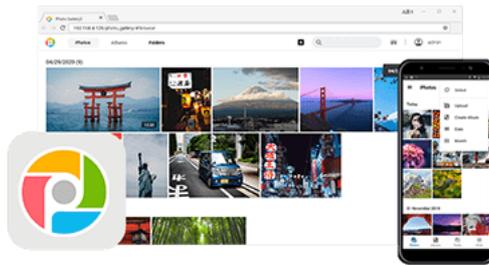

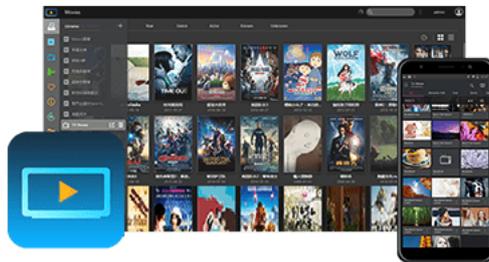

Photo Gallery 3
+
AiFoto 3

LooksGood
+
AiVideos

Web Center

Easily set up a website with Web Center. Install Apache or Nginx or almost any other web server implementation and add multiple website portals for an ea web server experience.

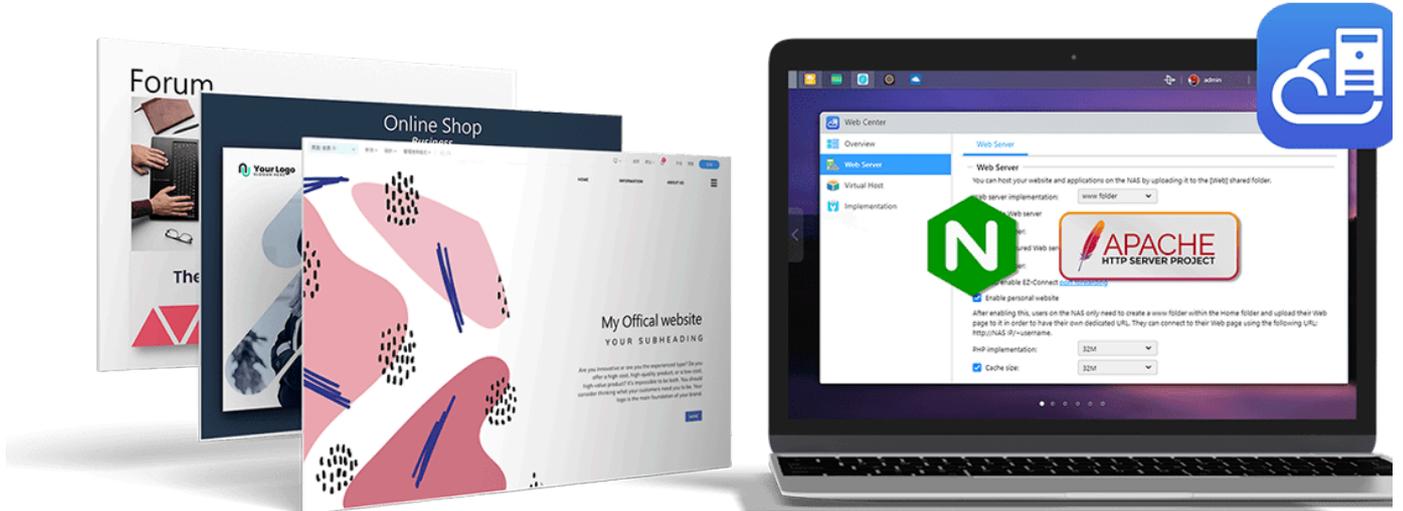

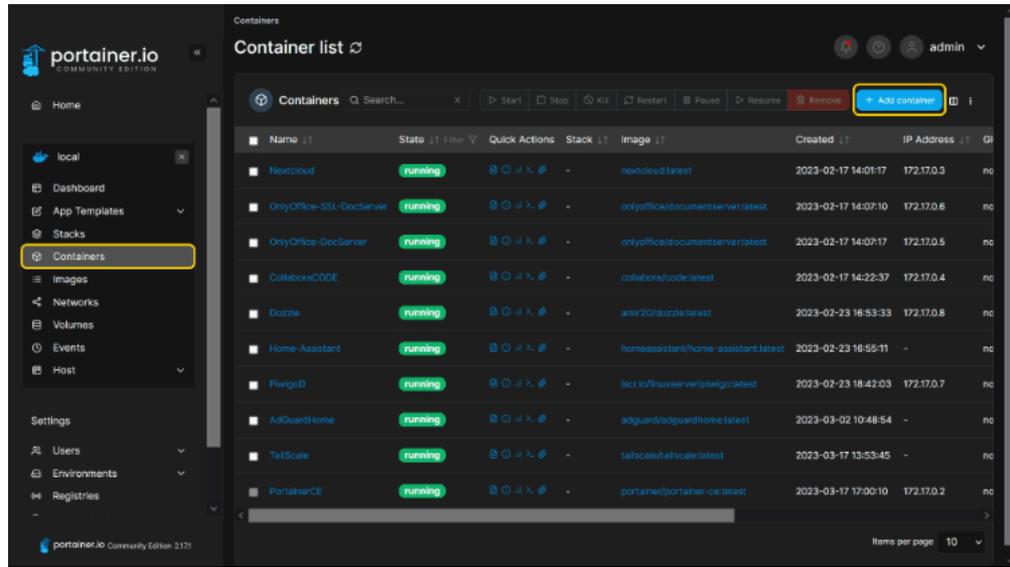

Photo Gallery 3 + AiFoto 3

The all new Photo Gallery 3 and AiFoto 3 have been revamped and brings a variety of new features to make photo organization easier than ever. New feat Photo Gallery 3 include, but not are limited to custom folder selection, timelines, smart albums, deduplication, and new photo modes. Easily blow up photos twice their size, play songs on slideshows, and customized share links make for an even better photo viewing and sharing experience.

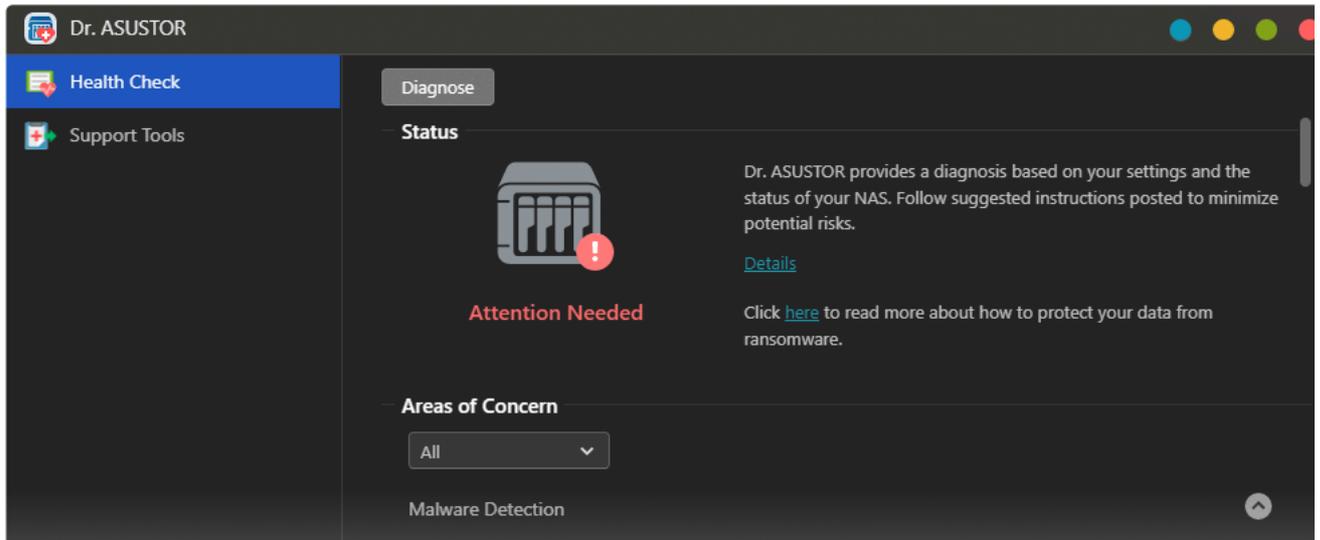

Portainer – Easy Docker Deployments

Even more possibilities for ADM with Portainer for Docker images. With thousands of images, Portainer can download and deploy more types of programs before. Portainer is incredibly user friendly and employs a graphical interface to make docker images easier to deploy than ever.

Dr. ASUSTOR

ASUSTOR provides a holistic solution for protecting your data against a variety of threats using Dr. ASUSTOR. Dr. ASUSTOR helps protect your data from threats, including, but not limited to ransomware attacks.

Mobile Apps

ASUSTOR's exclusive EZ Connect technology allows you to connect to your NAS from anywhere with your Mobile device in order to access and share your data. ASUSTOR mobile apps provide pass code lock functions in order to protect your privacy and data. You can also make use of HTTPS connections for even added security.

First-Class Product Warranty

All ASUSTOR NAS products come with a 3-year warranty. ASUSTOR c make customer service a priority in providing the highest standard of aft service and technical support.

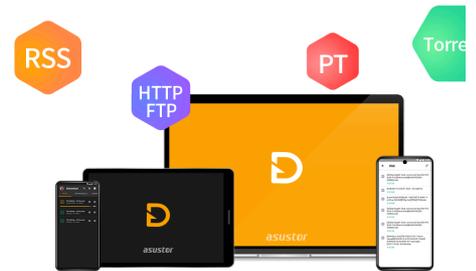

A movie theater in the palm of your hand

AiVideos brings you the smoothest mobile video viewing experience from NAS. Bro through the video collection on your NAS without needing to wait for long downloads Internet. Enjoy high-definition video streaming with just one click. AiVideos also supp multilingual subtitles and different audio channels to make enjoying films in different easy. Use AiVideos to bring the theater to your phone, tablet and set top box.

Download on the go

Imagine the convenience of downloading while on the go and then having your downloads ready as soon as you get home. With ASUSTOR's AiDownload, all this is possible and more. AiDownload is a mobile app that works with ASUSTOR's Download Center to provide you with download management on mobile. Searching, downloading, configuring and monitoring can all be done with AiDownload. Torrent* magnets also automatically add download tasks to AiDownload, making downloading easier than ever!

Your mobile device as your remote

Now your phone can become a remote control for the ASUSTOR Portal.

AiRemote allows you to control all types of functionality on the ASUSTOR Portal. Fr basic up, down, left, right controls used with the ASUSTOR Portal interfaces to the p rewind, fast forward and volume controls used when playing videos, AiRemote has c covered.

Furthermore, when using the web browser in ASUSTOR Portal, AiRemote provides Touchpad Mode giving you intuitive control over your web browsing.

Terabytes of music in the palm of your hand

AiMusic allows you to stream music from your NAS to your mobile device, letting you enjoy your entire music collection while on the go.

A variety of listening experiences

Play music from playlists that you create yourself for an optimal listening experience listening to random songs? AiMusic's Random songs play mode is your best friend! only select it once to create a random playlist from your entire music collection, allow enjoy a new listening experience each and every time.

Listen to your favorite songs while offline

AiMusic also allows you to download songs from your NAS to your mobile device for offline listening. No matter if it is a single song, an album or an entire playlist, all can be easily downloaded to your mobile device for convenient listening.

External Optical Drive Support

After connecting an external optical drive (CD, DVD, Blu-ray) to your NAS via USB, you can use File Explorer to directly access any files that you have backed up to optical media or even transfer files from your optical media to your NAS via drag and drop for future use.

Note:

1. This function only provides data access and does not support the audio and video playback of optical media.
2. Certain optical drives will require additional power in order to operate properly. If you find that your optical drive is not spinning or reading correctly, please use a USB Y-cable with additional power.

A cost-effective and efficient mail service solution

The ability to send and receive email is fundamental to all businesses. However, expensive implementation costs and complicated management create barriers for most small and medium sized businesses. ASUSTOR's Mail Server offers a comprehensive and cost-effective solution that allows any business to easily maintain their own dedicated mail server.

Your Data at your Fingertips

In addition to browsing files in an ASUSTOR NAS with a web browser, shared folder directly accessible on your phone or tablet through AiData. Mounted CIFS folders, U external devices, MyArchive hard drives and EZ Sync synchronization data are all s and can be easily accessed, moved or copied from within AiData.

Easy File Management

AiData provides a variety of file management features. AiData supports downloading and uploading files for backups. When browsing a large amount of data on the NAS, AiData supports both grid and list views to display, sort and manage files for better organization.

Downloading AiData

AiData is available for both Android and iOS devices. You can search for AiData in the App Store and Google Play or scan the QR codes below to download the app.

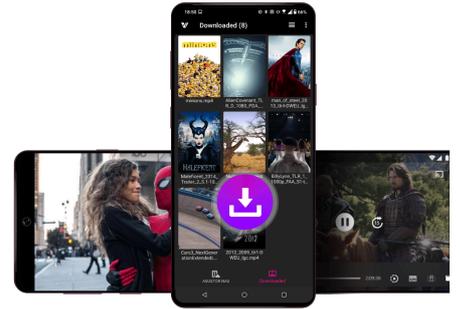

(<https://apps.apple.com/app/id685976952>) (play.google.com/store/apps/details?id=com.asustor.aidata.plus) (https://www.asustor.com/ai-data/#product_id=69#ai)

Offline Playback

Use your wireless network to download videos on your NAS to your phone or tablet with AiVideos. AiVideos supports offline video playback for enjoyment of movies when away from the house without using mobile data that may have bandwidth limits or poor reception.

Keep an eye on it

Worried about leaving your home unattended? Keep an eye on the most important t Surveillance Center. Surveillance Center's fully optimized interface allows you to simultaneously view live feeds from up to 4 IP cameras, take snapshots and control and zoom functions of all cameras giving you complete peace of mind.

Stay Connected to Everything You Care About with AiSecure

AiSecure allows you to easily keep an eye on everything that is happening at home. In addition to monitoring live views of particular locations, AiSecure also features instant push notifications that can be sent to your mobile device when specified events occur, allowing you to grasp all the latest developments in the palm of your hand.

Simple to Set Up

AiSecure dramatically simplifies the connection process to your surveillance feeds.* enabling Cloud Connect on your NAS, you will be able to use your dedicated Cloud connect to Surveillance Center, allowing you to easily monitor all the important thing: life from any corner of the world.

*AiSecure provides 3 different connection methods:

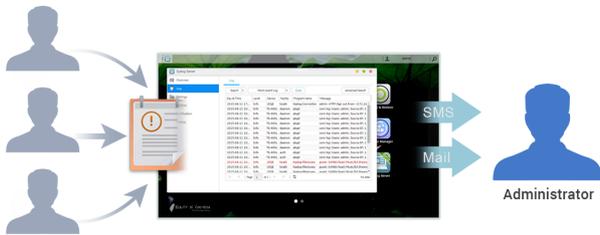

1. Connecting via Cloud ID.
2. Connecting via Auto Discovery to ASUSTOR devices on the same network.
3. Connecting via IP/Hostname.

iSCSI LUN Snapshots Stable, fast and capacity-saving

ASUSTOR's snapshot technology provides almost instantaneous creation of snapshots. It saves a significant amount of time and storage capacity when compared with traditional LUN backups. Should files become damaged or corrupted, the simple and intuitive interface allows administrators to quickly restore data, completing disaster recovery in the fastest time possible and providing uninterrupted service.

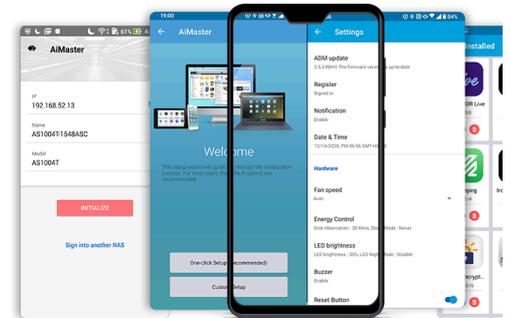

Effectively simplifying network management

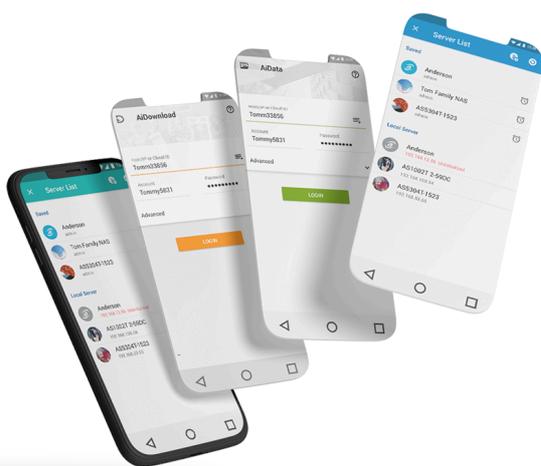

Syslog Server supports standard Syslog protocols and can centrally aggregate systems that are spread out over various network devices for storage and management. Furthermore, Syslog Server integrates with the NAS's Instant Notification function, allowing administrators to receive e-mails or SMS notifications when specified events occur, in order to quickly take appropriate measures.

Easily Set Up Your NAS

AiMaster enables you to initialize and activate your NAS immediately through your phone or tablet. Easily monitor your ASUSTOR NAS, add users, download and install apps, update ADM settings, making the new AiMaster easier than ever.

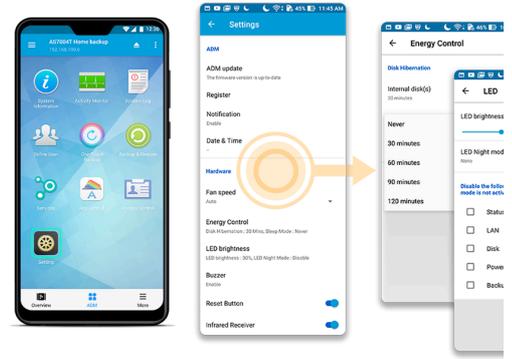

All-New Login Page

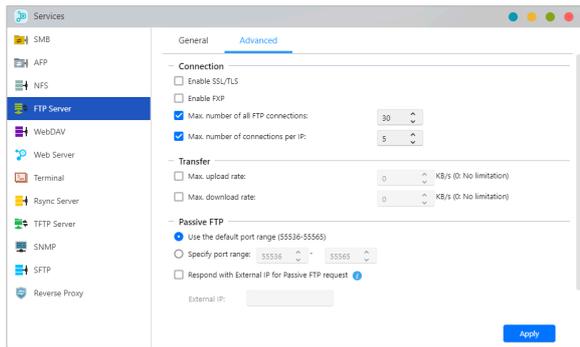

The all-new login page can share login information between other installed ASUSTOR apps, eliminating the need to enter login info multiple times. NAS devices that support LAN or WAN can directly be woken up by AiMaster.

Easily Set Up ADM

AiMaster is an app for phones and tablets for controlling and adjusting ADM settings.

Your own FTP server

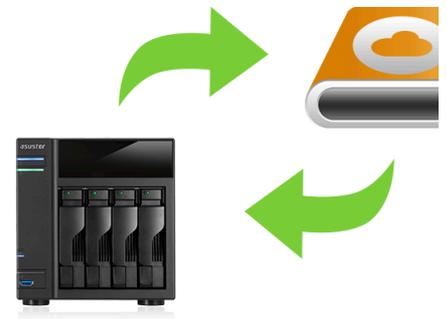

FTP is one of the most widely used and popular transfer protocols in the world. Ever ASUSTOR NAS has a built-in FTP server feature that allows you to create a person server in just a matter of seconds. Hosting your own FTP server will instantly give you power to share and exchange files over the internet.

Regular backups of your vital data

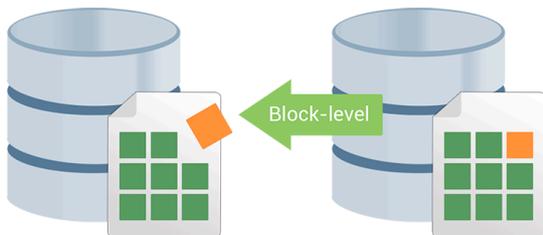

ASUSTOR's built-in RAID storage technology can provide a certain level of data protection, but regularly backing up the data on your NAS is also very important.

The External backup function supports two-way data transfers, incremental backups and also the scheduling of your NAS to perform regular backup jobs. It may be used to complete tasks such as:

- The transfer or backup of the data from your NAS to an external device.
- Initializing the copying of data from an external device to your NAS

The ultimate tool for remote backup

Rsync is an application originally developed for UNIX that is usually used for backup between two computers. By providing block level replication, Rsync is able to offer incremental backup. Incremental backup allows for successive backup jobs (after your first backup only copy data that has changed since your last backup job. Rsync is suitable for us and data that are always changing. It lets you cut down on backup time while significantly reducing bandwidth usage.

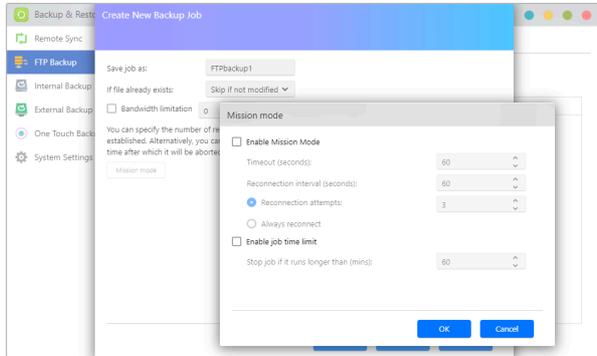

A rich and flexible backup solution

ASUSTOR's Rsync Backup function supports two-way data transfers, incremental backup, encrypted backup and also the scheduling of your NAS to perform regular backup jobs. It effectively simplifies data backup while also substantially reducing the burden on IT staff. ASUSTOR's Rsync backup function may be used to complete tasks such as:

- The transfer or backup of data from your NAS to an Rsync compatible server
- Initiating downloads of the data from an Rsync compatible server to your NAS

Mission Mode

Never again worry about your critical backup jobs stopping or failing to complete because ASUSTOR NAS won't stop until it's 'mission complete'. Sometimes backup jobs may be stopped because of various connection problems with a busy server on the other end. For Rsync, FTP, external and cloud backups, ASUSTOR's Mission Mode allows you to control the number of connection attempts and time interval for connection attempts, ensuring the successful completion of your backup mission. This also gives IT administrators a significant amount of flexibility when configuring backup jobs.

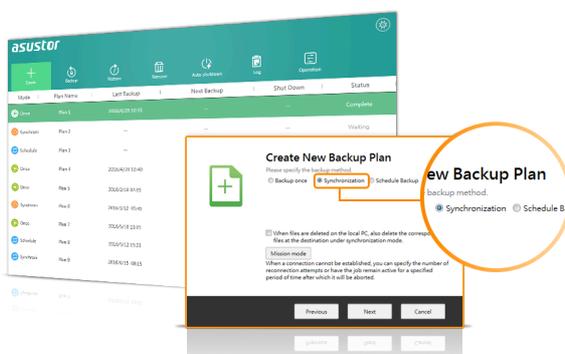

Set and forget

ASUSTOR's Backup Plan software for Windows provides you with worry-free backup. Simply schedule a regular backup job of your PC to your NAS, then let Backup Plan take care of the rest. Backup Plan will work in the background to ensure that your PC is always backed up.

A screenshot of the 'asustor' Backup Plan software interface. It shows a table of backup plans with columns for Mode, Plan Name, Last Backup, Next Backup, and Shut Down. The table lists several plans with different modes like 'Once', 'Synchronize', and 'Schedule'.

Mode	Plan Name	Last Backup	Next Backup	Shut Down
Once	Plan 1	2016/4/29 10:35	---	---
Synchronize	Plan 2	---	---	---
Schedule	Plan 3	---	2016/4/28 0:0	None
Once	Plan 4	2016/4/28 10:40	---	---
Once	Plan 5	2016/2/10 07:35	2016/3/10 07:35	---
Synchronize	Plan 6	2016/3/12 05:45	2016/2/10 07:35	---
Once	Plan 7	2016/5/10 13:35	2016/5/10 13:35	---
Schedule	Plan 8	2016/5/12 15:23	2016/4/12 15:23	---
Synchronize	Plan 9	2016/6/15 08:15	2016/5/15 08:15	---

Real time synchronization

Any data that is lost between scheduled backups is unprotected. Backup Plan lets you configure real time file synchronization for those important and ever-changing file folders. Changes that you make to your protected files and folders will be updated in real time. You can rest assured knowing that your critical files are always protected and up to date.

Unleash unlimited potential

The applications that come pre-installed with each ASUSTOR NAS device are just the beginning. At your convenience, you can browse through and download any applications that pique your interest from App Central. App Central allows you to explore the unlimited potential of ASUSTOR NAS devices while creating a personalized NAS device for yourself.

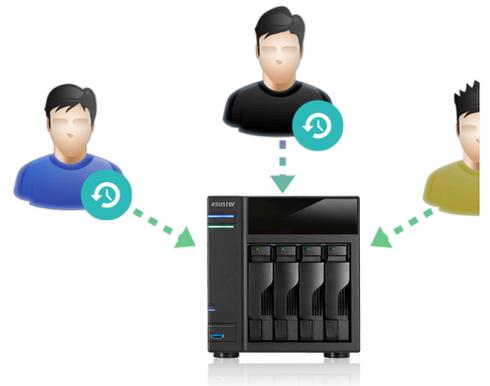

Optimized for your Mac

Mac lovers rejoice! You can use your Mac's built-in backup, Time Machine, to easily back up your Mac to an ASUSTOR NAS. All ASUSTOR NAS devices have been optimized for Time Machine, providing Mac lovers with a familiar and easy to use backup solution.

Multi-user support

Different Mac users can now safely backup their computers to the same NAS device. Unlike other NAS devices, ASUSTOR NAS does not just use one group account to carry out backup jobs for all Mac users, storing all their jobs under the same directory. With ASUSTOR NAS each Mac user is able to use an independent account and backup location thereby guaranteeing privacy for all.

No more waste

Still wasting money and time burning CDs or DVDs every time you need to install software? ASUSTOR NAS supports the mounting of ISO files which provides you with an effective and environmentally friendly solution that effectively lowers CD and DVD waste.

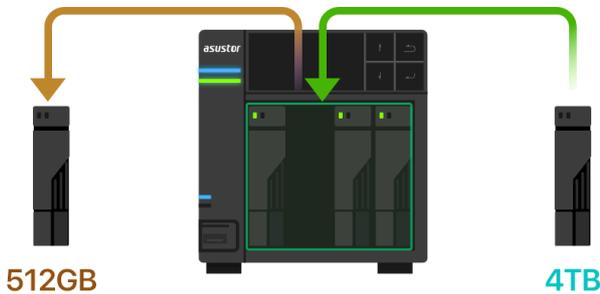

Ultimate data protection

ASUSTOR NAS makes use of RAID storage technology to provide protection for your data. RAID mainly revolves around the core concept of combining your disks to protect the data inside. ASUSTOR offers a number of different RAID level configurations that you can choose from when creating storage volumes. Each RAID level offers a differing degree of data protection, system performance and storage space.

ASUSTOR's supported RAID levels are summarized in the chart below:

RAID LEVEL	Single	JBOD	RAID 0	RAID 1	RAID 5	RAID 6	RAID 10
Minimum number of disks	1	2	2	2	3	4	4
Faulty Disks Tolerated	x	x	x	1	1	2	1
Increased System performance	x	x	v	x	v	v	v
Maximum use of Storage space	v	v	v	x	x	x	x

As Much Space as Needed!

Your ASUSTOR NAS supports capacity expansion. This means that you can easily add old hard drives or SSDs for higher capacity ones without deleting the volume and the storage capacity of your NAS with lots of convenience with little to no downtime.

- Only supported on RAID 1, RAID 5, RAID 6 and RAID 10 volumes.
- If replacing M.2 SSDs or hard drives without hot-swap functionality, your NAS will be powered down before removing drives.
- Hard drives or M.2 SSD can only be replaced one at a time. Attempts to replace drives simultaneously or while the NAS is synchronizing will cause data loss.

Uninterrupted Access

When expanding capacity, you will still be able to access everything stored on the NAS. Volume capacity expansion does not require advanced IT skills to execute and as long as installed drives are in working order, keeps your data intact. When it's time to upgrade, ADM gets it done.

Military Grade Encryption

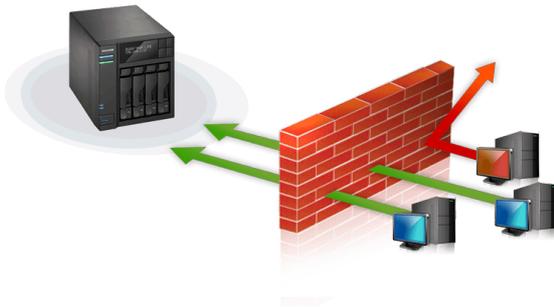

Your most important data deserves the best security. ASUSTOR NAS offers folder b military grade AES 256bit encryption, giving you the type of security and privacy that require for your most confidential data. All data stored in encrypted folders will be au encrypted and secured to the highest of standards. Should you ever lose your NAS disks, you still needn't worry about your sensitive data falling into the wrong hands.

Folder-based efficiency

Unlike other NAS devices, ASUSTOR NAS gives you the flexibility to select the individual folders that you want to encrypt. Other NAS devices encrypt entire storage volumes which significantly slows down the system. Any encrypted portions of storage volumes will be subject to a decrease in performance. However, with ASUSTOR NAS you are free to encrypt only your most confidential data while leaving other data unencrypted, creating a perfect balance between performance and security.

Firewall

Use ADM Defender's firewall to control access to your NAS. Ensure the security of y by deciding who has access to your NAS and who doesn't.

Network Defender

ADM Defender's Network Defender function protects you from malicious attacks and prevents hackers from trying to access your NAS. Any client IP addresses with too many unsuccessful login attempts to your NAS within a specified time period will be blocked by Network Defender.

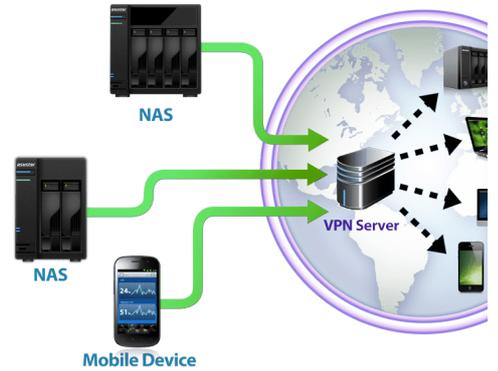

The best things in life are free

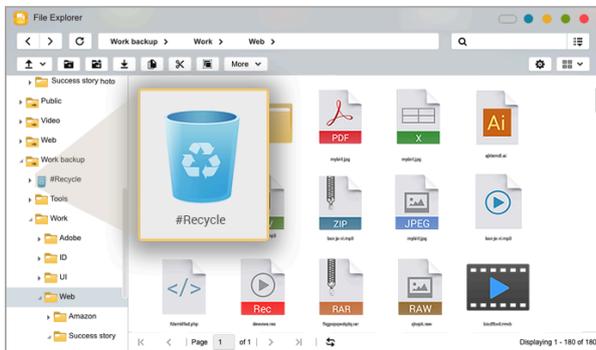

ASUSTOR's Surveillance Center comes with 4 license free channels letting you to s different network IP cameras. This significantly lowers startup costs for your surveilla system. No matter if you prefer to use Microsoft Edge, Mozilla Firefox or Google Chr Surveillance Center's easy-to-use browser based interface and quick start wizard wi to create a security surveillance system in a snap.

Secure connections

ASUSTOR NAS supports VPN connections giving you secure access and flexible deployment options. Your NAS is able to act as a VPN client which can then connect to VPN servers via PPTP, OpenVPN or WireGuard protocols, allowing you to gain access to different virtual private networks. ASUSTOR NAS also supports the creation of multiple VPN connection profiles allowing you to easily switch connections between different VPN networks.

Enhanced Recycle Bin mechanism

The Network Recycle Bin mechanism has been updated in ADM and is now based i individual shared folders rather than storage volumes. According to their needs, usei decide whether or not to enable a Network Recycle Bin for each individual shared fo enjoying added configuration flexibility. Files that are moved to the Recycle Bin maintain their original directory structure, all added convenience should users need to search for already deleted files. The simpl restore function will restore selected files to their original directory path while conven maintaining all properties and permissions settings.

Hardware Specifications

AS3304T v2

CPU	Realtek RTD1619B 1.7GHz (Quad-Core) Processor
Memory	2 GB (not expandable)
HDD	4x SATA3 6Gb/s; 3.5" HDD/2.5" HDD/SSD
Maximum Drive Bays with Expansion Unit (https://www.asustor.com/knowledge/detail/?group_id=1209)	16
Expansion	3x USB 3.2 Gen 1
Network	1x 2.5 Gigabit Ethernet (2.5G/1G/100M)
HDMI Output	N/A
Size	170(H) x 174(W) x 230(D) mm
Power Consumption	25.1W (Operation) 8.4W (Disk Hibernation);

Software & Features

Operating System

- ADM 4.1 Onwards
- Supports Online Firmware Updates

Supported OS

- Windows XP, Vista, 7, 8, 10, 11, Server 2003, Server 2008, Server 2012, Server 2016, Server 2019, Server 2022
- mac OS 10.6 Onwards
- UNIX, Linux, and BSD

Supported Languages

- Deutsch, English, Français, Italiano, Nederlands,Русский, 日本語, 한글, 简体中文, 繁體中文, Česká,Polški, Svenska, Dansk, Norsk, Suomi, Português,Türkçe, Español, Magyar, ไทย

Supported Browsers

- FireFox
- Chrome
- Safari
- Microsoft Edge

Network Protocols

- CIFS / SMB, SMB 2.0 / 3.0, AFP, NFS, FTP (Unicode Supported), TFTP, WebDAV, Rsync, SSH, SFTP, iSCSI/IP-SAN, HTTP, HTTPS, Proxy, SNMP, Syslog

File System

- Internal Disk: EXT4 ,Btrfs
- External Disk: FAT32, NTFS, EXT3, EXT4, HFS+, exFAT ,Btrfs

iSCSI Read/Write (5GB file, 1GbE x 1)/IP-SAN

- Maximum Targets: 256
- Maximum LUNs: 256
- Maximum Snapshot Versions of a Single LUN: 256
- Target Masking
- LUN Mapping
- ISO File Mounting
- Supports MPIO
- Persistent (SCSI-3) Reservations

Customized Sign In Page

- 2 Different Template Choices
- Customizable Title, Image and Background
- Image Import Function

Disk Management

- Scheduled Bad Block Scans
- Scheduled S.M.A.R.T Scans

Energy Control

- Configurable Disk Hibernation and Sleep Mode Wait Time
- Configurable Time Period for Sleep Mode Activation
- Automatic Sleep

Network

- TCP/IP (IPv4 & IPv6)
- Link Aggregation: 0
- SMB Multichannel
- Jumbo Frame (MTU)
- VLAN
- EZ Connect
- Wireless Network³
- DDNS and EZ-Router
- 2.5 GbE Supports Wake-on-LAN (WOL)
- 2.5 GbE Supports Wake-on-WAN (WOW)

Q See More (https://www.asustor.com/solution/wake_on_wan#wow)

Backup Solutions

- Rsync (Remote Sync) Backup
- Cloud Backup
- FTP Backup
- External Backup
- One Touch Backup
- EZ Sync
- MyArchive

System Administration

- Log Type: System Log, Connection Log, File Access Log
- Real-time Online User Monitor
- Real-time System Monitor
- User Quota
- Virtual Drive (ISO Mounting, Maximum 16)
- UPS Support

Network Recycle Bin

- Share folder-based
- Maintains original directory structure and file permission
- On-click restore
- Supports scheduled emptying
- Filtering rules
 - File size
 - File extension
- Deletion Settings
 - File size
 - File date

Access Control

- Maximum Number of Users: 4096
- Maximum Number of Groups: 512
- Maximum Number of Shared Folders: 512
- Maximum Number of Concurrent Connections: 512
- Supports Windows Active Directory
- Supports Windows Active Directory / LDAP

ACL

- Provides both Windows ACL and Linux ACL permission configuration methods
- Can enable Windows ACL for specific shared folders
- Comprehensive support for Windows' 13 types of advanced permission settings
- Can view Windows ACL permission settings from within A
- Supports local users and groups
- Exclusive permission reset function allows users to quickly default permissions

Security

- AES 256-Bit Encryption
- Firewall: Prevent Unauthorized Access
- Alert Notifications: E-mail, SMS
- Encrypted Connections: HTTPS, FTP over SSL/TLS, SSI-Rsync over SSH
- Built-in Hardware Encryption Engine: AS10/11/31/32/33/40/52/53/54/6/61/62/63/64/65/66/67/70 Series
- RAID Scrubbing: detects the integrity and consistency of RAID 6 and RAID 6 drive data.

Network Defender

- Auto black list
- Trusted list
- Black/White list
 - Supports IP/IP range/geolocation

External Devices

- Supports USB/eSATA3 External Storage Devices
- USB Wi-Fi Dongle Support
- Bluetooth Dongle/Speaker Support
- USB Printer Support
- USB DAC/IR Receiver/Keyboard/Mouse Support
- CD ROM Drive/DVD ROM Drive/Blu-Ray ROM

Featured Apps

Antivirus (ClamAV)

- Scheduled Scans
- Automatic Virus Definition Updates
- Quarantine Infected Files

Download Center

- Supports BT(Torrent & Magnet Link), HTTP and FTP Downloads
- Torrent Search
- Choose Files Before a BT Task Starts
- Customizable Download Schedule
- Bandwidth Control
- RSS Subscription and Automatic Downloading (Broadcatching)
- ASUSTOR Download Assistant for Windows & Mac
- AiDownload for Android with Push Notification
- Smart Download Function

Cloud Backup Center

- Support Amazon S3, Backblaze B2, Microsoft Azure Blob Storage, Alibaba Cloud, Baidu Cloud, IBM Cloud and Rackspace Cloud Files, SFTP, WebDAV, Box, hicloud S3, Google Cloud Storage
- Immediate or scheduled backup
- Perform multiple backup tasks and back up multiple accounts

DataSync Center

- Support OneDrive, OneDrive Business, Google Drive, Dropbox, and Baidu Wangpan, Yandex
- Supports file filter and bandwidth limitation
- Supported backup methods:
 - Sync
 - Directly upload files to Cloud from NAS
 - Directly download files from Cloud to NAS

File Explorer

- Web-based File Management
- ISO File Mounting
- Share Links
- Task Monitor
- Browse Files on Local PC
- Thumbnail Previews
- Data Access via External Optical Drive
- Supports video playback¹⁰

FTP Explorer

- Directory Structure View with Drag & Drop Transfers
- Task Monitor
- Stopping of Transmission Task & Resumption of Connection
- Encrypted Connections: Explicit over TLS, Implicit over TLS
- FTP Site Manager
- Bandwidth Control
- Maximum Simultaneous Transfer Control

HiDrive

- Support OneDrive and OneDrive Business
- Each ADM Account is Able to Individually Log in to One HiDrive Account
- Supported Backup Methods:
 - Directly Upload Files to HiDrive from NAS
 - Directly Download Files from HiDrive to NAS
- Supported Protocols:
 - Rsync
 - FTP
 - FTPS
 - SFTP
 - Rsync + SSH

LooksGood

- Built-in three main video library categories; movies, TV shows, home movies and smart video sorting management
- Efficient global search function allows for searches by keywords followed by the execution of more detailed searches for the purpose of finding categories of movies, TV shows, home movies and parameters such as actors, director, year, genre, writer and title
- Attractive poster wall and thumbnail display
- Automatic production of video poster thumbnails
- Centralized management and ability to configure order of favorites and playlist history
- System administrator is able to configure video library and editing permissions according to user preferences
- Can configure access permissions to share with friends and family
- Multimedia conversion feature
- Self-defined smart folder for video conversions
- Easy Streaming with Chromecast and DLNA
- Supports playback of videos in Apple TV via AiVideos tvOS version

OwnTone

- For iTunes on Mac & Windows
- Supports AirPlay
